PROFILE SUMMARY

Software Engineering student at FAST NUCES with hands-on experience in full-stack web development, AI-powered applications, Retrieval-Augmented Generation (RAG), and data analytics. Skilled in React, Flask, Python, and modern AI tools. Strong foundation in data structures, databases, and software engineering principles. Passionate about building practical solutions and continuously learning emerging technologies.

EDUCATION

FAST NUCES Peshawar <i>Bachelor of Software Engineering</i>	Aug 2023 – Jun 2027
Global College & Academy of Natural Sciences, Muzaffarabad AJK <i>Intermediate (FSc Pre-Engineering)</i>	2021 – 2023

PROJECTS

- Civic Issues RAG Chatbot** | *Flask, LangChain, FAISS, Sentence-Transformers, Groq API*
- Developed a domain-specific chatbot for civic issue resolution using Retrieval-Augmented Generation (RAG).
 - Integrated LangChain and FAISS for semantic search and contextual document retrieval from knowledge sources.
 - Built a Flask-based backend API for real-time query processing and grounded response generation.
 - Improved answer relevance by grounding responses in retrieved, domain-specific knowledge documents.
- React Notepad App** | *React, Supabase, PostgreSQL*
- Built a cloud-based note management application with secure user authentication and session handling.
 - Implemented full CRUD operations with persistent cloud storage using Supabase and PostgreSQL.
 - Deployed a production-ready version with automated CI/CD pipeline via GitHub Actions.
- Power BI Sales & Performance Dashboard** | *Power BI, Pandas, Power Query*
- Cleaned and transformed e-commerce sales data using Pandas and Power Query for analysis-ready datasets.
 - Built an interactive dashboard analyzing sales, profit, customer segments, categories, and regional performance.
 - Implemented filtering and drill-down functionality; generated KPI visualizations for data-driven decisions.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C, C++, SQL
Frameworks & Libraries: React, Flask, LangChain, Pandas, NumPy, Matplotlib, NetworkX
Databases: MySQL, PostgreSQL, Supabase, FAISS
Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Linux, Power BI
AI & Data: Retrieval-Augmented Generation, Hugging Face, Groq API, Prompt Engineering, EDA, Data Cleaning
AI Tools: Claude, Cursor, GitHub Copilot, ChatGPT

RELEVANT COURSEWORK

Data Structures & Algorithms · Software Design & Architecture · Database Systems · Operating Systems · Agile Development · Computer Organization & Assembly Language · Object-Oriented Programming

ACHIEVEMENTS & ACTIVITIES

- Personal Portfolio:** Designed and deployed a personal portfolio website at rehanhaider.netlify.app showcasing projects and skills.
- Continuous Learning:** Actively exploring LLM integration, prompt engineering, and full-stack AI application development.
- Community:** Engaged in peer learning and collaborative problem-solving within FAST NUCES software engineering cohort.
